Imagine a world with no clean drinking water. You walk miles each day, only to carry gallons of dirty water back to your family which, without a doubt, will make them sick. This is water poverty and the harsh reality of those living in the Central African Republic (CAR).

A bold new way to end water poverty

Central African Republic QUICK FACTS

- **Approximately 4.9 MILLION** people
- **About the size of** TExAS
- **French and Sango** are the main languages
- **53** is the average life expectancy
- **Annual per capita income** is $805

Visit waterforgood.org to become part of the solution.

WATER POVERTY IS A SOLVABLE ISSUE.

So, how can you get sustainable clean water to one of the poorest countries in the world?

Your financial donation can directly provide clean water. Just $5 provides a year of clean water for one person. Visit waterforgood.org to become part of the solution.
WHY DRILL?

For many communities in the Central African Republic, water is within their reach. Drilling provides access to that clean water beneath the ground.

You can provide new water access to areas that have never had clean water:

- $5 provides one person with a year of clean water
- $3,000 help complete a community well
- $18,000 drill a new water well using a manual pump
- $60,000 install one solar-powered pump system

WHY MAINTAIN?

The community’s water pump is used – a lot! When parts fail, there has to be established maintenance services to ensure water continues pumping to the community.

The cost of maintenance:

- $40 monthly maintenance for one well
- $480 yearly maintenance for one well
- $4,600 the cost of one maintenance motorcycle
- $45,000 the cost of one maintenance truck

fun fact

Our maintenance teams travel around 30,100 miles a year. That’s like driving from Maine to California 19 times a year.

YOU CAN...

- Stand in the gap and make unclean water a thing of the past
- Ensure that no child dies from a waterborne illness
- End water poverty in our lifetime

Become a water hero.
Your generosity will end water poverty in the Central African Republic, for good. Join the movement.
