Last year, I chose the word **persist** as our mantra. At the time, I didn’t know how applicable that word would become. As you look through this Annual Report, behind the numbers and stories, there is an underlying attitude of persistence. Our Maintenance Team didn’t give up when dangerous rebel activity caused them to reroute and postpone maintenance visits. When shipping delays occurred, our New Water Access Team remained persistent in getting their tasks done.

Thank you for **persisting with us**. In 2004, we knew creating a sustainable water infrastructure in a country that has hardship stacked against them was not going to be easy. Your support acts as motivation to us, encouraging us to push forward, even when things get difficult.

I hope you enjoy reading about your impact and how your support made a significant difference in the lives of those in the Central African Republic (CAR).

**Forever grateful,**

JON ALLEN, CEO
WATER FOR GOOD
A NOTE FROM JON
CLEAN WATER FOR LOMI
MAINTENANCE MATTERS
DRILLING MATTERS
MONEY MATTERS
TRUCKS MATTER
DONORS MATTER
This past winter, 232 donors rallied behind dozens of communities in the CAR, wrapping up the funding for **94 water points**! These water points had been hand-picked earlier in the year for their need for clean water and were simply waiting on final funding. Among these projects is the neighborhood of Lomi, which will be receiving a solar-powered pump system with six tapstands.

Gisele lives in Lomi and is 15 years old. She is very excited that her community well was “wrapped up” and wanted to thank you for her Christmas gift!
DID YOU KNOW A TYPICAL HANDPUMP NEEDS YEARLY ROUTINE MAINTENANCE?

Installed with the best of intentions, between 40 and 60 percent of the pump projects in Sub-Sahara Africa are not currently pumping clean water. That’s NOT the case in the Central African Republic. Due to the efforts of our diligent Maintenance Team, at any given time, over 96% of our water points are functioning, providing fresh clean water to fathers, mothers, sons and daughters.

YOUR SUPPORT PROVIDED:

- **2,754** maintenance visits
- Fuel for **17,719** miles of travel
- Salaries for **11** pump technicians
- Parts to ensure over **96 percent** functionality
- Maintenance visits in **nine** of the 16 prefectures across CAR
IN 2022 WE PLAN TO

- PURCHASE A FIFTH VEHICLE TO ADD AN ADDITIONAL MAINTENANCE TEAM
- HIRE AN ADDITIONAL PUMP TECHNICIAN
- RESTOCK OUR WAREHOUSES WITH NECESSARY SPARE PARTS
- LAUNCH THE INAUGURAL SOLAR-POWERED PUMP MANAGEMENT TEAM
- PERFORM 3,800 MAINTENANCE SERVICE VISITS

MEET THE MAINTENANCE TEAM

This past year, our New Water Access Team (previously known as the Drilling Team) was challenged with learning how to install a different type of water source, the cutting-edge solar-powered pump systems. With only installing three prior to 2021, they worked hard completing six tank systems with 32 corresponding tapstands. These systems are installed in larger communities, providing clean water to around 500 people per tapstand.

YOUR SUPPORT PROVIDED:

- 28 new handpumps
- 6 solar-powered pump systems
- 32 functioning tapstands
- 24,500 people with first-time clean water access

IN 2022 WE PLAN TO

- INSTALL 120 NEW WATER POINTS
- PROVIDE CLEAN WATER TO AN ADDITIONAL 55,000 PEOPLE
- ADD A NEW 4X4 DUMP TRUCK TO OUR FLEET
- INCREASE OUR CAPACITY FOR DRONE ELEVATION MAPPING
- HIRE MORE INSTALLATION TECHNICIANS
- PURCHASE ANOTHER PICK-UP TRUCK FOR THE SOLAR-POWERED PUMPING INSTALL TEAM
Would you believe, there are less than 25 gas stations in the Central African Republic? To put that number in perspective, in the state of Indiana alone, there are over 3,300 gas stations. Our teams rely heavily on dependable trucks to transport themselves and vital equipment to remote locations.

Last year, you took note of the importance of trucks, generously adding several new vehicles to the fleet. With a lot of work planned this year, our team is excited for them to arrive soon!

Known as “the people’s radio station,” we are the only short-wave radio station in the country, broadcasting local information in the local language. As opposed to FM radio stations, short-wave stations reach people living anywhere in the country and even beyond.

**THE DAILY RADIO STATION BROADCASTS:**
- weather updates
- public health initiatives
- hygiene lessons
- national news coverage
- the love of Jesus
On a warm September evening, Earl and Sana Quijada welcomed guests to their mountain-view home for a dual purpose: celebrating the memory of Sana’s father who had a heart for missions and raising awareness of the clean water mission. Earl currently serves as a Board Member for Water for Good. Our founder, Jim Hocking, and our CEO, Jon Allen, were able to join the fundraiser, explaining the impact donors are making towards providing clean water to the Central African Republic.

Together, they raised $28,712 specifically for the community of Nola. Installing nine water points will provide clean water for 4,500 Central Africans.

“Dovetail Impact Foundation began partnering with Water for Good in 2019 because of their coachable, entrepreneurial leadership and their evidence-based track record of effectiveness. We have been grateful for their Christ-centered dedication to serving the people of the Central African Republic, which has been a powerful witness to us.”

JANA KINSEY, INVESTMENT DIRECTOR, DOVETAIL IMPACT FOUNDATION
GIFTS FOR GOOD

On a mission to empower the world, we aim to help people and the planet through gift-giving. We are focused on serving the corporate gifting industry, giving a better gifting experience.

While researching organizations to partner with, we were impressed with Water for Good’s strategy and methodology as well as their transparency in solving the water crisis. Partnering together since 2018, we love to hear the tangible impact our business has been able to be a part of through this partnership.

Clean water is a basic human right that does not exist everywhere. It’s a problem we know how to solve and literally saves lives. Access to clean water is a top cause for the Gifts for Good community, and we are thankful for the impactful work Water for Good provides in communities in need.

KATIE RUBY

Growing up with a father who worked for the local water department, I was always an advocate for safe, reliable drinking water. Today, I work as a water resources engineering consultant, helping water utilities plan for and develop reliable water supplies.

Last year, I met Jon Allen (Water for Good CEO) through my mother-in-law and began to learn about the state of water in the Central African Republic. While we tend to take safe drinking water for granted in the United States, many people in the CAR walk miles for water that oftentimes isn’t even clean. The more I learned, the more I realized Water for Good’s mission and approach align with my personal, spiritual, and professional calling.

I am thrilled to now be a board member of Water for Good and, together with my husband Ethan, support them as a donor. Clean water is within reach, and Water for Good is working to make it a reality for every man, woman, and child in the CAR.

CHARITY:WATER

“Since 2007, Water for Good has been an important charity: water partner and their work in the Central African Republic is truly inspiring. It’s one of the most challenging places in the world to work and their team is tireless in their dedication to provide clean water to communities in need.”

SCOTT HARRISON, CEO OF CHARITY:WATER

JIMMY AND KRISTIN ELSNER

Nine years ago, we learned about Water for Good through MudLOVE, a give-back ceramics business where we both worked. It wasn’t the branding or the annual reports that got our attention, it was their simple focus to see a single country gain access to clean water. We’ve learned so much about the centrality of clean water within the context of community development.

Seeing the bigger picture for clean water’s impact on school attendance, small business development, and even local roads makes us feel like we’re part of something bigger than giving money to people in need. We hope to pass this perspective onto our children, helping them to see that giving is about being a part of something that will extend beyond our lifetime.
